Proceeds support the mission of Notre Dame Health Care

Our service offerings include assisted living; skilled nursing for long term care and short-term post-acute rehabilitation; and adult and pediatric hospice and palliative care. When you support Notre Dame Health Care, you enable us to provide exceptional care to residents and patients; you give much-needed support to assist family members struggling with the secondary effects of illness and disease; and you empower students and caregivers who rely on our educational services to access the support they need to increase their knowledge, earning power and self-sufficiency, bridging the gap between where they are and where they want to be.
